Frequently Asked Questions

How does paint protection film help my car?

Paint protection film for cars acts as an invisible shield against stone chips, scratches, and environmental damage. It preserves your original paint and maintains resale value while being virtually undetectable.

What's the difference between ceramic coating and graphene coating?

While ceramic coating on cars provides excellent protection and gloss, graphene coating for cars offers superior heat dissipation and enhanced durability. The graphene coating price in Chennai reflects this advanced technology.

Do you offer car wash services for coated vehicles?

Yes, our car wash and car cleaning services are specifically designed to maintain ceramic coating, graphene coating, and paint protection film without causing damage.

Can I get interior car detailing with exterior services?

Absolutely! Our comprehensive car detailing packages combine interior car detailing with exterior paint correction and protective treatments for complete vehicle care.

What's included in your sun film for car service?

Our car tint installations use premium sun film for cars with various darkness levels. We ensure legal compliance while providing maximum heat rejection and UV protection.

Are you really the closest car detailing service near me?

Our Porur location serves as a convenient car detailing shop near me for residents across Chennai. We're easily accessible with ample parking for all auto detailing services.
